1. Visitors Exploring Enterprise Information Seminar

We would like to take this opportunity to thank all attendees of our Exploring Enterprise Information Seminar in Delft (Holland) last December. We appreciate the fact that we could meet you all in person and discuss information exploration topics with you.

The presentations are still available from our website. You can find them here:

2. On-going development of Aduna products

Sesame 2.0 Beta 1 and 2 were released last month and has already been downloaded many times. The new major version is planned for release before summer 2007.

We have found an active group of beta-testers for AutoFocus 4.0 Beta-2, to boost development towards a final release. We would like to thank you all

for your support! Your help is much appreciated!!

3. Aduna Guided Exploration suite 3.2 released!

Updated versions of the components of the Aduna Guided Exploration suite are now available from our website:

- Aduna AutoFocus 3.2
- Aduna Spectacle 3.2
- Aduna Metadata Server 3.2

These releases contain mainly small improvements and bugfixes requested by the community and our customers.

These new versions are a recommended (compatible) upgrade for the 2006.2.x release.

The software is available from our website:
